# ELECTRIC AUTO-LITE EQUIPMENT & PARTS LISTS

## ELECTRICAL EQUIPMENT LIST

**BUDA (Engine)**  
(Issued 4-27-54)

Page 1

| YEAR & MODEL  | PART NO.  | YEAR & MODEL                                | PART NO.  |                           |                                    |
|---|---|---|---|---------------------------|------------------------------------|
| <p><b>NOTE:</b> Due to the many types of mounting for the electrical equipment on industrial engines, the part numbers of the actual electrical units should be specified when ordering parts.</p> <p>In general this list shows the interchangeability of the various electrical units, however, most of the engines have been built with more than one type of mounting for the electrical equipment. Also not all of any one mounting group are interchangeable because of size limitations, required performance or to special features.</p> <p>The listing of an engine model for a particular unit or mounting type does not mean that all of that model use that unit or that the other electrical equipment on the engine can be found in this list.</p> <p>See page 4 for industrial truck models.</p> |   | <b>GENERATOR (Cont.)</b>                    |   |                           |                                    |

| YEAR & MODEL   | PART NO. | YEAR & MODEL  | PART NO. |
|--|----------|---|----------|
| <p><b>NOTE:</b> Due to the many types of mounting for the electrical equipment on industrial engines, the part numbers of the actual electrical units should be specified when ordering parts.</p> <p>In general this list shows the interchangeability of the various electrical units, however most of the engines have been built with more than one type of mounting for the electrical equipment. Also not all of any one mounting group are interchangeable because of size limitations, required performance or to special features.</p> <p>The listing of an engine model for a particular unit or mounting type does not mean that all of that model use that unit or that the other electrical equipment on the engine can be found in this list.</p> <p>This equipment listing shows only the basic engine model, and the units listed have been used on one or more of the variations.</p> |          | <p><b>GENERATOR (Continued)</b><br/>Cradle mounting, CWDE rotation.</p> <p>1940-41 FM3 (Her.
